April 2024

Soft Skill Development

Rubicon Skill Development

Feb 2024

Introduction to Java

Coding Ninja

July 2023

PROJECT

Attend Ease

- Developed a full-stack Python-based web app using Django for attendance tracking with QR Code integration.
- Implemented Django's MVT pattern.
- Initiating from front-end design, I progressed to backend logic and database implementation.

Automated Email Sender

- Created Automated Email Sender in Python with SMTP protocols.
- It involved using email and a special password sent for extra security.
- Gmail offers two-step authentication to enhance account security.

EXPERIENCE

Python Developer Intern

OctaNet Services

March 2024 - April 2024

- Developed backend features for an e-commerce platform.
- Developed automated email alert system in case of any order delays, ensuring timely communication with customers.
- Contributed to improving the user experience of the customer.
